

Your associates learned to think in law school — we teach them how to work.

Delphoria Learning helps firms accelerate associate readiness — bridging law school doctrine with day-one practice skills, AI literacy, and the workflows that protect margin and partner time.

THE GAP BETWEEN HIRING AND BILLABILITY

New attorneys are expected to manage discovery, communicate with vendors, understand document review, and support case teams — often before they have received practical training. The cost shows up as partner rework, slower matters, inconsistent client deliverables, and avoidable mistakes.

WHY FIRMS CHOOSE DELPHORIA

ACCELERATE BILLABILITY

Get associates to confident, independent work product faster — with workflow training that maps to how matters actually move.

REDUCE PARTNER REWORK

Less time spent fixing fundamentals means partners can focus on strategy, clients, and the work only they can do.

PROTECT MARGIN

Train teams on the operational habits that protect realization: scoping, vendor management, AI verification, and clear client reporting.

POPULAR WORKSHOP TOPICS

- eDiscovery Fundamentals
- Vendor Communication
